

MHTN
ARCHITECTS

Architect/Healthcare Planner

MHTN Architects in Salt Lake City is seeking an Architect & Healthcare Planner with experience in the healthcare market to take a leading role in growing our healthcare team.

MHTN is a 70-person design firm specializing in the planning and design of Healthcare, K-12 Education, Higher Education, Corporate, Civic and Religious projects with decades of experience in-state and regionally, as well as across the nation and overseas. As a firm, we operate around core values of design, respect, client service, empowerment, accountability, teamwork, environmental responsibility, technical expertise, and community service. MHTN offers a collaborative work environment that promotes professional growth and advancement. We seek team members who have a passion for designing built environments and self-motivated contributors that will embrace and expand our culture.

We are searching for architectural healthcare planner candidates who are well organized, creative, forward thinking, detail oriented and work effectively in a collaborative team environment while also working autonomously on given tasks.

Responsibilities:

- Provide expertise as a member of a project team in the programming and planning of both medical outpatient clinics and inpatient facilities.
- Lead the medical planning process and assist in the development of design concepts that meet project budgets and schedules.
- Develop documentation through all project phases, including construction administration to ensure conformance with design intent.
- Contribute to the growth and knowledge of the healthcare design group.
- Communicate effectively with clients and the project team.

Requirements:

- Minimum of 5 years of relevant experience in the planning of healthcare projects.
- Technical knowledge in the programming and planning of healthcare facilities, including healthcare delivery systems and medical equipment.
- Experience and understanding of engineering systems, equipment, technology requirements, detailing and how they relate to construction.
- Experience with necessary codes, licensing and regulatory standards.
- Revit project experience and proficiency is required.
- Bachelor's/Master's Degree in Architecture from accredited school, licensure required.
- LEED, ACHA, EDAC certifications are preferred but not required.

Position offers a competitive compensation package including vacation, personal leave, health and 401k benefits.

Interested candidates are asked to submit your salary history or requirements, employment history, professional and client references, and a relative project list with responsibilities to Linda Kruse (linda.kruse@mhtn.com) along with their resumes.
